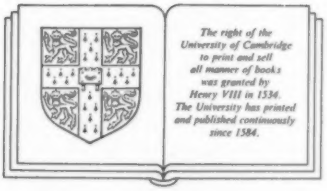
JOURNAL OF FLUID MECHANICS

VOLUME 243

OCTOBER 1992



CAMBRIDGE UNIVERSITY PRESS

Cambridge

New York Port Chester Melbourne Sydney

NOTES FOR AUTHORS

Authors wishing to have papers published in the *Journal* should send them to any editor, choosing one in their own or a neighbouring country where possible. The submission of three copies will expedite assessment, although it may not be possible to return all these copies. Original drawings should not be sent until the paper is accepted. The initial submission will be acknowledged by postcard but not subsequent communications. Submission of a paper implies a declaration by the author that the work is not being considered for publication elsewhere and that it has not already been considered by a different editor of the *Journal*. Reports on conferences must be submitted within three months of the meeting.

Authors are urged to write their papers clearly and attractively, so that their work will be readily accessible to readers. Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be in black Indian ink or from a high-quality laser printer, and should not be larger than 30 cm by 45 cm. Lettering to be inserted by the printer should be shown clearly on copies of the figures, rather than on the original drawings. A typed list of captions should be provided at the end of the manuscript. Extensive detailed mathematical relations, tables or figures likely to be useful only to a few specialists may be held in the editorial files, with copies being made available to readers on request.

Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication, although the cost of any colour plates (roughly £500 per page) must be borne by authors. An author is entitled to 50 offprints of his paper free of charge, and additional offprints can be purchased if ordered when proofs are returned.

COPYING

The *Journal* is registered with the Copyright Clearance Center, 27 Congress St., Salem, Mass. 01970. Organizations in the USA which are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of US copyright law) subject to payment to C.C.C. of the per-copy fee of $5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0022-1120/92/$5.00+ .00

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA is authorized to supply single copies of separate articles for private use only.

For all other use of material from the *Journal* permission should be sought from Cambridge or the American Branch of Cambridge University Press.

SUBSCRIPTIONS

The *Journal of Fluid Mechanics* (ISSN 0022-1120) is published by the Cambridge University Press in 12 volumes each year. All orders must be accompanied by payment. Single volumes cost £52 net (US $93 in the USA and Canada) plus postage. The subscription price (which includes postage) to volumes 234–245, 1992, is £585 (US $1080 in the USA and Canada) for institutions: £305 (US $540) for individuals. Copies of the journal for subscribers in the USA and Canada are sent by air to New York. Second class postage is paid at New York, NY, and at additional mailing offices. Claims for missing issues will be considered only if made immediately upon receipt of the subsequent issue. Copies of back numbers are available from Cambridge University Press. POSTMASTER: send address changes in USA and Canada to *Journal of Fluid Mechanics*, Cambridge University Press, 110 Midland Avenue, Port Chester, New York, NY 10573–9864.

Volume 243 October 1992

CONTENTS

Influence of variable properties on the stability of two-dimensional boundary layers. H. Herwig and P. Schäfer *page* 1

Numerical simulation of polydisperse sedimentation: equal-sized spheres. J. M. Revay and J. J. L. Higdon 15

The transient response of a contained rotating stratified fluid to impulsively started surface forcing. G. S. M. Spence, M. R. Foster and P. A. Davies 33

On the stability of weakly nonlinear short waves on finite-amplitude long gravity waves. Jun Zhang and W. K. Melville 51

On the structure of cellular solutions in Rayleigh–Bénard–Marangoni flows in small-aspect-ratio containers. Henk A. Dijkstra 73

Asymptotic theory of thermal convection in rapidly rotating systems. Jun-Ichi Yano 103

Internal solitary wave breaking and run-up on a uniform slope. Karl R. Helfrich 133

Weakly nonlinear theory of the alternation of modes in a circular shear flow. S. M. Churilov and I. G. Shukhman 155

Stokes flow of a cylinder and half-space driven by capillarity. Robert W. Hopper 171

The three-dimensional evolution of a plane mixing layer: the Kelvin–Helmholtz rollup. Michael M. Rogers and Robert D. Moser 183

Further results for convection driven by the differential sedimentation of particles. Ross C. Kerr and John R. Lister 227

Laboratory studies on the surface drift current induced by wind and swell. Zhan Cheng and Hisashi Mitsuyasu 247

Breakdown regimes of inertia waves in a precessing cylinder. Richard Manasseh 261

Satellite and subsatellite formation in capillary breakup. M. Tjahjadi, H. A. Stone and J. M. Ottino 297

On a degeneracy of temporal secondary instability modes in Blasius boundary-layer flow. W. Koch 319

The three-dimensional structure of periodic vorticity layers under non-symmetric conditions. Omar M. Knio and Ahmed F. Ghoniem 353

The natural and forced formation of spot-like 'vortex dislocations' in the transition of a wake. C. H. K. Williamson 393

Stability of Taylor–Dean flow in a small gap between rotating cylinders. Falin Chen and M. H. Chang 443

Numerical investigation of three-dimensionally evolving jets under helical perturbations. J. E. Martin and E. Meiburg 457

Shear flow over a wall with suction and its application to particle screening. Wang-yi Wu, Sheldon Weinbaum and Andreas Acrivos 489

Some aspects of bifurcation structure of laminar flow in curved ducts. Hsiao C. Kao 519

An investigation of wall-layer dynamics using a combined temporal filtering and correlation technique. A. M. Naguib and C. E. Wark 541

The effect of charge emission from electrified liquid cones. J. Fernández de la Mora 561

Nonlinear evolution of small disturbances into roll waves in an inclined open channel. J. Yu and J. Kevorkian 575

Fine-scale turbulence structure of intermittent shear flows. V. R. Kuznetsov, A. A. Praskovsky and V. A. Sabelnikov 595

Multi-wave interaction theory for wind-generated surface gravity waves. Roman E. Glazman 623

Nonlinear hydromagnetic waves in a thermally stratified cylindrical fluid. Part 1. Exact translationally and axially symmetric solutions. Hiromitsu Hamabata 637

An asymptotic theory for the linear stability of a core–annular flow in the thin annular limit. E. Georgiou, C. Maldarelli, D. T. Papageorgiou and D. S. Rumschitzki 653

The resistivity and mobility and functions for a model system of two equal-sized proteins in a lipid bilayer. Stuart J. Bussell, Donald L. Koch and Daniel A. Hammer 679

Turbulence measurements in a round jet beneath a free surface. D. G. Anthony and W. W. Willmarth 699

Reviews

Nonlinear Waves in Real Fluids, edited by A. Kluwick 721

Theory of Structured Multiphase Mixtures, by F. Dobran 722
